

156 THURSDAY

Dear All,

might be some letters from you, might not, too. I realise some of you are feeling deep fatigue. I also realise I need to pay a lot of attention to this, especially because I am in relatively high energy.

Solutions: - time of for all  
- " off for those who really feel whacked  
- loads of wakeners-up.

We need to discuss this when you have finished your letter.

I wonder how the "trainer tells own day-story" was for you. What ~~value~~ value, if any, did it have for your learning/development?

I had a very good supervision with Sally just after the 5.45-6.05 session with you.

No repetition, I worked on other problems the day had held. If you don't understand the term "supervision", please ask me.

You are giving me a very exciting course. (in a real way I am a participant on all courses I lead).

a hug. orario
